

Menu Items

 [Favorites] Add Current	Add Current	Adds the current file to the favorites
 [Favorites] Configure...	Configure	Configure the favorites
 [Favorites] About	About	Show the about window

You can also use the menu items by using the toolbar

Configure

When you select the configure option you are presented with a window with all your favorites.

Here you can rearrange the items by moving them Up (1) or Down (2). Add single files (3) directly from the file system. Or add all files in a specified folder (6). You can also add a Separator (4) between favorites. Separators will be created above the next item, regardless of the value of the submenu. And of course you can Remove (5) an item.

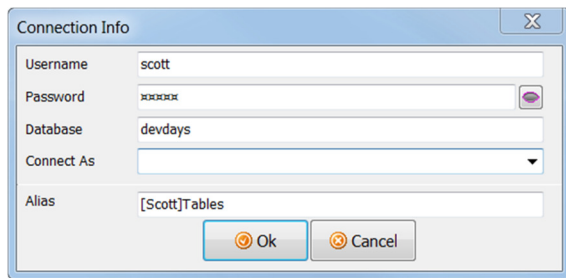

Type the name of the submenu in this box (7) and press the button (8) to add it to your dropdown box (9).

Based on the image prefix (10) the dropdown box (11) is filled with your images.

Registered version only:

By pressing the Connection Info button (12) you can specify connection info for certain files. When you select a window as 'pinned' this information is recorded as well. You can also choose to store the password (13). If you want to use files on a shared location, e.g. Google Drive, you can enter a path (14) that will be used as a replacement for the %PATH% text in a favorites filename.

If you select the Connection Info button a form will be shown with the settings for this favorite. The password is not shown by default, but you can see it in plain text by pressing the button next to the field.

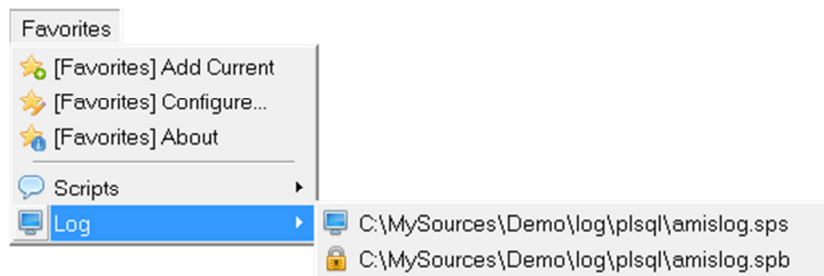

The image shows a 'Connection Info' dialog box with a blue title bar and a close button (X) in the top right corner. The dialog contains several input fields and buttons:

- Username:** A text field containing the value 'scott'.
- Password:** A text field containing 'xxxxxx'. To the right of the field is a small purple button with a white eye icon, used to toggle password visibility.
- Database:** A text field containing the value 'devdays'.
- Connect As:** A dropdown menu that is currently empty.
- Alias:** A text field containing the value '[Scott]Tables'.
- Buttons:** At the bottom of the dialog are two buttons: 'Ok' (with a yellow checkmark icon) and 'Cancel' (with a red X icon).

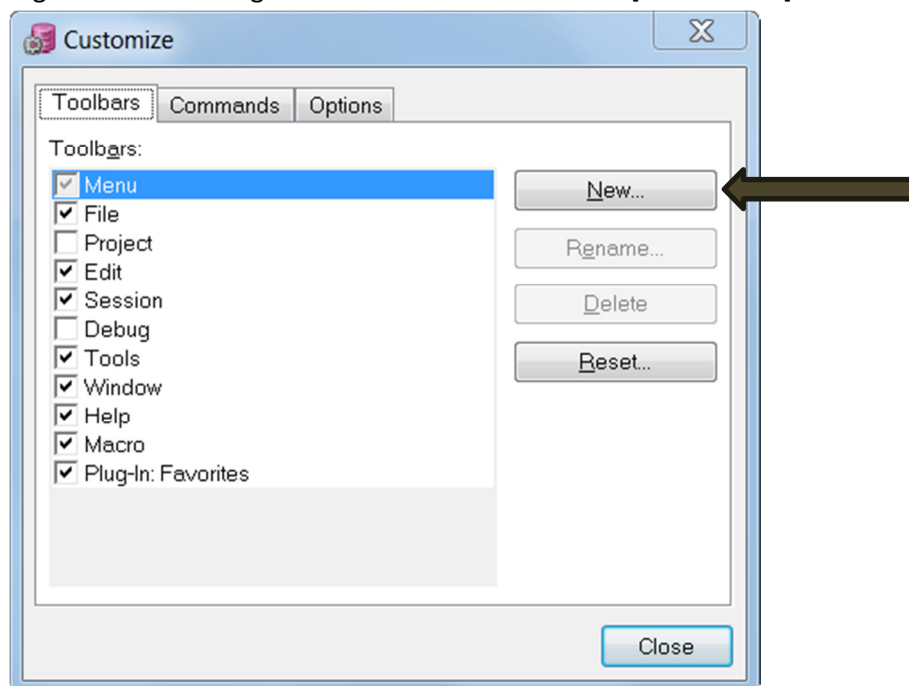

Other options:

Show full path	Show the full path to the favorite in the menu
Show favorites on mainmenu	Shows you favorites menu on the topmenubar instead of as a submenu in the file menu
To the right of	Choose the menu to the right of which your menu should be displayed (if Show favorites on mainmenu is selected)
Menu item name	The name of your favorites menu
Allow duplicate images	Allow the same image to be used more than once.

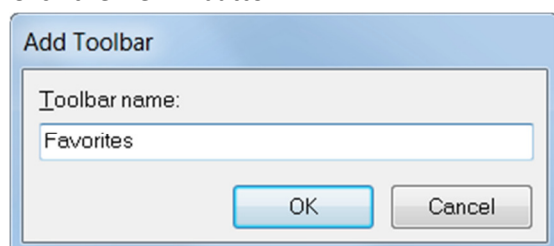

Toolbar

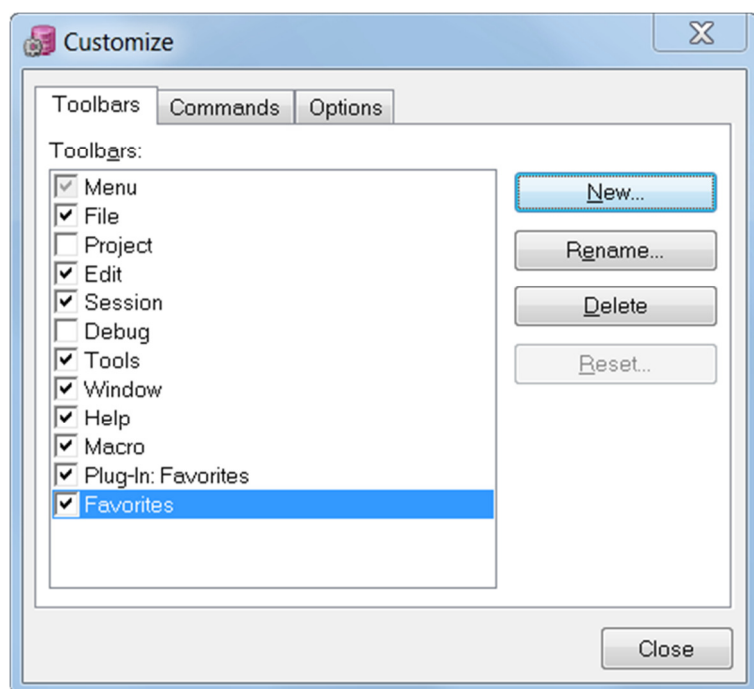

You can add your favorites to a (new) toolbar. To do this go through these steps:
Right click an existing button or a menu and choose [Customize...]

Click the New... button

Type the name of the toolbar in the editbox. Press OK.

On the second tab (commands) scroll down until you find the Plug-in: Favorites v2.3. Here you can select the favorites you want and drag-and-drop them one by one to the desired toolbar (either an existing one or the one just created).
